

BROAD SPECTRUM CBD AND CBG

EB-C1™ / EB-C4™ / EB-C5™

Your doctor has prescribed one of our CBD products.

EB-C1 sublingual oil, EB-C4 and EB-C5 advanced transdermal creams provide broad spectrum, rapidly absorbing, THC-free CBD & CBG options for optimal health.

EB-C1

Sublingual Oil

Dosage:

Use 1/2 (0.5ml) dropper one to two times daily or as directed by your healthcare professional. Fill dropper to appropriate dosing line, hold under tongue for 30 seconds and swallow.

Servings:

60 servings per bottle,
1 dropperful per serving

EB-C4 / EB-C5

Broad Spectrum
Transdermal Cream**Dosage:**

Apply 1-4 times per day or as advised by your healthcare provider.

Therapeutic Active Pharmaceutical Ingredient Guide

EB-C1	STRENGTH	DESCRIPTION
Cannabigerol (CBG)*	1800mg	Closely mimics the activity of CB1 and CB2 receptors + Neuroprotective Effects - Inflammation
Cannabidiol (CBD)	3600mg	Modulates the production and efficacy of endocannabinoids + Analgesic Properties - Inflammation

EB-C4 / EB-C5	STRENGTH	DESCRIPTION
Cannabigerol (CBG)*	3000mg	Closely mimics the activity of CB1 and CB2 receptors + Neuroprotective Effects - Inflammation
Cannabidiol (CBD)	3000mg	Modulates the production and efficacy of endocannabinoids + Analgesic Properties - Inflammation
Myrcene	3000mg	- Inflammation and Oxidative Stress
Beta-Caryophyllene	3000mg	- Inflammation and Oxidative Stress
Arnica	2000mg	- Inflammation and Oxidative Stress
MSM (Methylsulfonylmethane)	2000mg	- Oxidative stress - Inflammation
Botanical Complex	-	+ Cooling Effect
ICE-1™ Transdermal Base	-	+ Tissue penetration + Systemic exposure

*CBG is featured exclusively in EB-C1 and EB-C5.

+ increase - decrease

EB-C1, EB-C4 and EB-C5 are formulated by licensed physicians and pharmacists. USA hemp sourced CBD/CBG — vegan-friendly, organic ingredients. *References available upon request.*

What is the CBD and CBG product line?

EB-C1 is a THC-free sublingual CBD and CBG oil that provides full broad-spectrum benefits to promote optimal health.

EB-C4 is a THC-free transdermal CBD cream that features additional ingredients to promote optimal health.

EB-C5 is a THC-free transdermal cream that features both CBD and CBG along with additional ingredients to promote optimal health.

What is the difference between CBD & CBG?

CBG, often referred to by experts as “the mother of all cannabinoids,” is the cannabinoid from which other types of cannabinoids (including CBD) are derived.

Cannabidiol (CBD) is one of many active compounds in the cannabis plant.

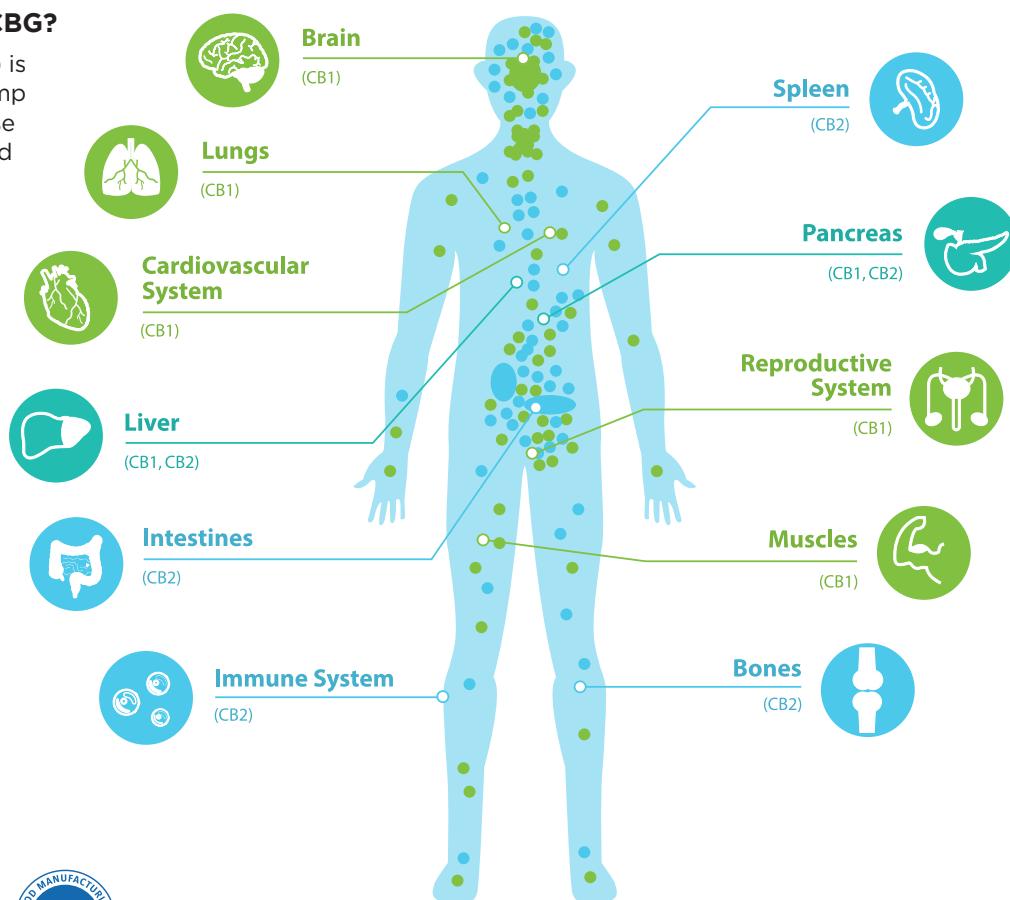

CBD and CBG are both non-psychoactive compounds (meaning neither one produces a “high” reaction) and have anti-inflammatory properties. Both have a remarkable safety profile.

What is the science behind CBD/CBG?

Cannabidiol (CBD)/Cannabigerol (CBG) is derived from cannabinoids found in hemp that act on cannabinoid receptors. These receptors exist throughout the body and help promote homeostasis, impacting thousands of physiological processes and nearly every bodily function. The benefits of CBD/CBG may include anti-inflammatory effects, neuroprotective properties, and potent antioxidation.

When CBD/CBG reacts with the receptors Cannabinoid Receptor Type 1 (CB1) and Cannabinoid Receptor Type 2 (CB2), the Endocannabinoid System (ECS) is established. The main function of the ECS is to maintain the body's homeostasis through the production of CB1 and CB2 receptors.

Precautions: Do not take if you suspect you are pregnant or allergic to any of the listed active or non-active pharmaceutical ingredients.

ICE-1™ - Proprietary transdermal base to promote local and systemic absorption.

Manufactured in compliance with current Good Manufacturing Practices. [cGMP].
